

DECISION GIVEN IN FAVOR OF GOMPERS

He, Mitchell and Morrison Were Erroneously Sentenced to Jail.

Washington, May 15.—Setting aside the sentences of imprisonment imposed by the supreme court of the District of Columbia, for alleged disobedience to a boycott injunction, the supreme court of the United States today held that Samuel Gompers, John Mitchell and Frank Morrison, president, vice president, and secretary, respectively, of the American Federation of Labor, has been erroneously sentenced to jail on a charge of contempt of a local court.

The court unanimously held that the only sentences that could be imposed on the labor leaders was fines. In so holding, the supreme court of appeals of the District of Columbia and the supreme court of the district erred in treating the contempt proceedings as a criminal case and not a civil one. The effect of holding the proceedings a civil one was to make jail sentences impossible. Hence the jail sentences had to be set aside.

To correct the error, the case was sent back to the local courts with direction that it be dismissed. At the same time the court expressly made it possible for civil proceedings to be

instituted against the labor men by the Bucks Stove & Range company, at whose instance the original contempt case was brought. The court was led to hold that the contempt proceedings in this case must be civil in nature because criminal punishment is exercised by courts to force persons to do acts commanded. In the present case, the court took the view that the labor men were being sent to jail, not to make them do something the court ordered, but because of "something they had done." Inasmuch as all the differences between the labor men and the Bucks Stove & Range company have been adjudicated, including the "boycott" case out of which the contempt proceedings arose, today's decision is probably the last to be heard of this famous action.

Justice Lamar delivered the court's decision. He began at 12 o'clock to read the written opinion without announcing the decision. Many minutes were spent in reviewing the facts.

A. T. & T. CO ANNUAL REPORT.

Stockholders' Report Contains Much Interesting Data.

The annual report of the American Telephone and Telegraph company for the year 1910 was issued to the stockholders on March 13th last and contains some very interesting data concerning the growth of business during that year as well as outlining the com-

pany's various policies.

At the end of the year there were 5,882,719 Bell stations in the United States, an increase of 740,027 stations over the previous year; 1,852,951 of these were operated by local, co-operative, working in connection with the Bell Companies, under traffic agreements. The total mileage of wire in use for toll and exchange service was 1,642,212 miles, of which 1,162,186 was added during the year just closed. These figures do not include the mileage of connecting companies. The average number of daily toll connections amounted to 602,560 and exchange calls averaged 21,681,590 daily. The amount of new property acquired during the year amounted to \$53,582,818.00, and the cost of maintenance and reconstruction for that period was \$2,028,000.00 while it is estimated that about \$60,000,000.00 will be spent during 1911.

The cost of operation amounted to \$54,000,000.00, current maintenance cost \$5,700,000.00 and \$8,000,000.00 was paid in taxes, while \$26,200,000.00 was set aside to cover depreciation in plant. The total capitalization of the Bell system amounts to \$1,114,310,979.

OREGON SHORT LINE

IS BOOSTING UTAH

Two descriptive advertisements of Utah and her wealth, "done up in a nutshell," have been published for a few months in eastern magazines by the Oregon Short Line railway com-

pany, which is fulfilling its agreement to extend a million and a quarter dollars annually in advertising the intermountain and Pacific coast country. One of the most striking of their ads is "We accepted the desert as we found it and make it a garden spot." Great good will come from this advertising, and the railway company is doing good work which should receive the commendation of every booster.

LADIES!

House cleaning has now begun. We do not ask you to use Uncle Sam's Cleanser because it is a home product, but because it is positively the best. See what one of Utah's leading men says of it:

Office of the Presidency of the Brigham Young University and Church Normal Training School, Provo, Utah, Feb. 9, 1911.

Mr. Fred Turner, 361 South Fifth West, Salt Lake City, Utah.

My Dear Sir

In reply to yours of the 8th inst., it is my pleasure to speak a good word for the "Uncle Sam's Cleanser" and to unhesitatingly declare it to be the best Cleanser that ever came to our household. An "Old Time Cleanser" was our favorite until the arrival of "Uncle Sam's." We tried it on painted wood-work and stone steps with better effect than we have ever obtained from our previous favorite.

GEO. H. BRIMHALL.

P. S.—The following letter was in reply to our inquiry whether we could use the first one in a public way.

Office of the Presidency of the Brigham Young University and Church Training School.

Provo, Utah, Feb. 21, 1911.

Mr. Fred Turner, 361 South Fifth West, Salt Lake City, Utah. Fifth West-Salt Lake City, Utah.

My Dear Sir

You are at perfect liberty to make use of my letter if you see fit. I did not write it simply because your article was a home product—patriotism is not a part of the motive. "Uncle Sam's Cleanser" stands strictly on its merits in competition with everything I have used in this line. Very truly yours,

GEO. H. BRIMHALL.

It should be remembered that the formula of this leading cleanser has been prepared by the chemists of the Agricultural college and confirmed by State Chemist Herman Harms of Salt Lake, and is positively guaranteed not to be injurious to the hands. Weddings, birthday and Christmas presents are always in order.

Wash Your Hands with it When Greasy and See how Smooth They Will be.
